print-it

Let's discover the Internet!

Print a magazine from a web page.
Designed with CSS print* for a one-off
publication every time you print !

*language that manages the printed aspect of a web page

OP007 ...... - ...... - ....../42   Objet Papier

---

1 Using a *CHROME* browser
go to this URL:
↘ https://objetpapier.fr/print-it/

2 Enter the requested
informations and click
on PRINT.

**3** On the print window, adjust
the settings like this:

Destination > choose your printer
Pages > all
Copies > 1
Colors > Back and white

In the "more settings" menu:

Paper size > A4
Pages per sheet > 1
Margins > default
Scale > default
Options > Check the
"background graphics" checkbox

4 Load the 16 blank sheets
in the printer and start
printing by clicking
on PRINT.

---

5 Fold each one of the sheets
now printed following the
dashed line.

Make sure to leave the
printed faces outside.

6 Cut the cover sheet in half
following the dashed line.
As well as the tape on the right
side of the sheet n°2 on page 4.

7 Gathers the folded sheets
between the two cover sheets
then bind it together using
the plastic binding rod included.

Tips 1 : you can help yourself with
drawing clips to hold your pack.
Tips 2 : use the rounded corner of the
rod to insert the sheets with ease.

Leave the silver sides of the cover
and back-cover, following the mentions
in the margins.

8 All done, reading time!
